OBJECTIVE

I am a Software Developer who has had the chance to work on large projects from the technically-complex backend to the beauty and aesthetics of the UI.

I have experience developing large enterprise web-based applications, mobile apps, and automatization apps; combining nice Javascript(React.js+ES6) code with strong backend technologies like dotnet/python, as well as using frameworks such as Dotnet Core and Python Flask. I always try to create nice products with clean, scalable, and maintainable architecture.

Additionally, I have work experience designing the architecture of solutions for Windows (Windows Server) and Linux (ubuntu and debian) deployed in different cloud providers such as Microsoft Azure, Amazon Web Services, and DigitalOcean. I have to admit, I fell in love with docker powered with containers orchestration like Docker Swarm and k8s.

Passionate about technology and always learning new technologies. I also participate in software development communities and enjoy teaching others.

WORK EXPERIENCE

MAS Global Consulting

Dic 2018 — Present

Mid-Senior Software Developer

- React.js + Redux
- Asp.net MVC 5 / Web Api
- Unit test with karma and Jest
- SQL Server
- SAFe® methodology as Scaled Agile Framework
- Continuous integration with Azure DevOps

Intergrupo

Dic 2017 — Dic 2018

Software Developer

- .NET developer specialized in web applications.
- Implementation of projects with MSMQ
- Development of Apis RESTFul on .net core + Docker
- Work with MVC 5, Webform and SPA Applications with Angular.js/React.js
- Oracle and SQL Server. Update Integration Services ETL workflows
- Work on the SCRUM development framework

Softpymes S.A.S

March 2012 — Dic 2017

System Administrator and Software Developer

- Participate developing Pymes+ ® accounting software for small and medium companies with Silverlight

component and C#. Perform integration with other platforms with restful APIs.

- Implement and administrate Windows Server 2008/2012/r2 for production and testing.
- Creating and implementing entity relationship models on SQL Server 2008/2012/2014 database.
- Implement architectures with Amazon Web Services and Microsoft Azure, creating applications for easy deployment core softpymes applications and update system on cloud environments.
- I participate in architecture definition and implementation of licensing system company Softpymes S.A.S and software for managing all the tools of "hosting" and "cloud" services.
- Definition new architecture for Pymes® accounting software with Python language focused on a cross platform using docker platform and MySQL, and Angular.js frontend.
- Manage and monitoring Ubuntu Server on production environments with AWS.

Supervisor: Javier Ramírez - 311 300 8876

Thinker S.A.S

December 2011 — March 2012

Technical support and developer

- Performed general bash task for the log processing for betting shop.
- Generate SQL queries for postgres database to specific reports.
- Provide support for administration system and reports.
- Monitoring SQL performance to show issue reports.

Supervisor: Carlos Palacios

PROYECTS

2019 - SelNav / More than a year

Customer: JCI - Johnson Controls

Abstract: Selection Navigator is the internal software for estimating projects used by the customer.

Technologies: Core Libraries, asp.net mvc 5 and javascript vanilla.

2018 - Software de Seguros. / 6months

Customer: Intergrupo

Abstract: Wizzard to process all the records extracted by ETL

Technologies: Angular.js rendered on Asp.net WebForms pages and Asp.net WebApi

2018 - PlatziVideo - / 1 Month

Customer: SelfLearning proyect - <https://github.com/Whistler092/react-plazi-video>

Abstract: Display all videos by categories

Technologies: React.js + Redux.

2018 - Water-recycling-system-movil - / 2 Months

Customer: UNIAJC proyect - <https://github.com/Whistler092/water-recycling-system-movil>

Abstract: It is a mobile application that allows you to link with a microcontroller that sends events when gray water recycling occurs.

Technologies: Ionic 2. an Asp.net WebApi

2017 - Bolsa de Empleo / 6 Months

Customer: Softpymes s.a.s

Abstract: Web platform created to Softpymes customers and publish his job offers.

Technologies: Angular.js SPA connected with Python/Flask backend.

2016 - Club de Contadores / 6 Months

Customer: Softpymes s.a.s

Abstract: Web platform created to SoftPymes which customers can recommend the product and win awards

Technologies: Angular.js SPA connected with Python/Flask backend.

2016 - Pymes+ / 1 Year

Customer: Softpymes s.a.s

Abstract: Build the first version for current Software Platform built on Silverlight.

Technologies: Angular.js SPA connected with Python/Flask backend.

QUALIFICATIONS

- 2009 - Centro colombo americano. Level – High Intermediate.
- 2018 - Mentalidad de Lider - Senavirtual
- 2018 - Platzi.com - React.js and redux
- 2016 - Platzi.com - Carrera de Administración de Servidores y DevOps
- 2016 - Platzi.com - Curso de Docker
- 2016 - Platzi.com - Introducción a Linux.

Certification: <https://github.com/Whistler092/ramirobedoya.me/tree/gh-pages/Files>

EDUCATION

Computer Engineering

July 2015 — Present

Institución Universitaria Antonio José Camacho - UNIAJC

- Current student of Computer Engineering.

Computer technologist

Jan 2009 — Dec 2012

Universidad Santiago de Cali

- Additional, I participated on Telebio research lab during whole 2012

INTERESTS

Amateur Maker, programmer, and empiric music. Passionate about technology and always learning new technologies, also I participate in software development communities and love teaching other people.
